

THE MOST TRUSTED NAME IN WHEEL HARDWARE.

When it comes to making trustworthy wheel hardware, there's no substitute for experience. And nobody has more experience - or vehicle coverage - than Dorman.

After 100+ years of engineering and manufacturing wheel lug bolts, studs, and nuts, our growing coverage fits 99% of domestic and 95% of import vehicles on the road today. Dorman direct-replacement wheel hardware is precision-manufactured and thoroughly tested to ensure the consistently high-quality technicians and owners have come to rely on for decades. All our hardware meets SAE mechanical, material, and torque testing requirements, and we use the latest advanced laser technology for thread inspections. Our wheel studs are made in the USA, and all of our newest hardware is subjected to 240-hour salt spray corrosion testing to ensure durability under the toughest conditions.

Comprehensive coverage – our wheel hardware fits 99% of domestic and 95% of import vehicles

Rigorously tested – all wheel hardware meets SAE mechanical, material, and torque testing requirements, with laser-inspected threads

Continuous focus on quality – our hardware is benchmarked to original equipment dimensions and seating surfaces to ensure safety and lug wrench fitment

Improved designs – we offer direct replacements for 250 million vehicles, and a large selection of OE FIX™ wheel nuts engineered to replace failure-prone two-piece capped lug nuts with coverage for 168 million cars and trucks

DORMAN WHEEL HARDWARE

Eliminate wheel hardware headaches.

PROBLEM: Two-piece OE design

Stock wheel nuts use a thin finishing cap that swells and deforms with repeated use, preventing proper removal, often serving as the catalyst for expensive damage to wheels when attempting to remove them for service.

FIX: Solid design
Dorman OE FIX™ wheel nuts are made of solid carbon steel with a corrosion-resistant chrome finish to help increase durability.
