ENGINE GROUND STRAP KIT

*This kit does not replace the battery ground cable. A cable must be attached from the negative side of the battery to either the vehicle frame or the motor.

The large strap included with the kit will allow proper grounding between the engine and frame.

- Find an existing bolt on the motor that the ground strap can attach to. This will need to be in such a place that will keep it off the exhaust and away from the belt(s) but also allow enough length to connect the other end of the ground strap to the frame or front cross member.

Painless Performance Limited Warranty and Return Policy

Chassis harnesses and fuel injection harnesses are covered under a lifetime warranty. All other products manufactured and/or sold by Painless Performance are warranted to the original purchaser to be free from defects in material and workmanship under normal use. Painless Performance will repair or replace defective products without charge during the first 12 months from the purchase date. No products will be considered for warranty without a copy of the purchase receipt showing the sellers name, address and date of purchase. You must return the product to the dealer you purchased it from to initiate warranty procedures.
